PROFILE

I'm a UI/UX Designer with a background in Graphic Design, currently focused on creating clean, user-friendly interfaces and effective digital experiences. Since 2024, I have been specializing in UI/UX design, working on both freelance projects and within a company environment.

PROFESSIONAL EXPERIENCE

Al Mutakamela 🔗

02/2026 – Present | Dubai, UAE

UI / UX Designer

- a **UAE-based product** company providing vehicle testing, registration, and related services approved by RTA.
- Worked on creating and designing a mobile application for the service platform.
- Contributed to improving and adding new features to the ERP system.
- Focused on creating clear, user-friendly experiences that simplify service processes.

Paymac 🔗

02/2024 – Present | 6th of October, Egypt

UI / UX Designer

- a **software house** that provides digital solutions for different businesses.
- Worked on many projects including mobile applications, landing pages, e-commerce platforms, and ERP systems.
- Designed clean, user-friendly interfaces and improved overall user experience.
- Collaborated with the team to create clear and effective digital products.

PROJECTS

Al Mutakamela App & Website - Vehicle Testing & Registration

An RTA-licensed mobile & web application for "Al Mutakamela Vehicle Testing" in Dubai, offering digital vehicle inspection booking, registration renewal, and automotive services.

- Built an intuitive online appointment booking flow for vehicle testing and registration.
- Integrated flexible payment solutions, including Tabby and Tamara interest-free installment plans.
- Structured detailed interactive offerings for RTA inspections, ownership transfers, and mobile services.
- Designed a modern, fully responsive user interface optimized for high-volume customer interaction.

Al Mutakamela - Enterprise Marketing Dashboard

A centralized marketing management hub built for "Almutakamela Vehicle Testing" to streamline channels, tools, and media assets.

- Built a unified dashboard to manage social media and communication channels.
- Integrated AI tools, automation workflows, and SEO analytics.
- Developed a media library to categorize and manage digital assets.
- Designed an enterprise-grade interface to streamline team workflows.

MetaPos – Point of Sale & Retail Management System

A cloud-based POS and inventory management platform designed to streamline sales, billing, and business operations for retail and hospitality businesses.

- Built an efficient checkout system supporting fast invoice generation and multiple payment methods.
- Implemented real-time stock tracking and product management features.
- Integrated reporting dashboards to track daily sales, profits, and performance metrics.
- Seamlessly connected POS cashier terminals with receipt printers and barcode scanners.

Volta App & Website - Electric Vehicle

A modern digital platform providing electric vehicle (EV) charging solutions, station locator tools, and green mobility services.

- Integrated interactive maps to help users find nearby EV charging stations and check real-time availability.
- Enabled seamless tracking, scheduling, and control of EV charging sessions.
- Featured commercial and residential EV chargers, accessories, and technical specifications.
- Designed a sleek, responsive interface for optimal user experience across mobile and desktop devices.
